

POD 2.0 Migration Service for SAP DM

Migrate to POD 2.0 today - it's faster, more reliable, and more secure, and upgrading now keeps you on the platform built for what's next.

What is the POD 2.0 Migration Service?

An AI-powered migration service that moves SAP DM POD 1.1 solutions to POD 2.0 — automated code conversion is just one part.

Available to SAP Digital Manufacturing customers as well as System Integrators

It also covers fit-to-standard analysis, standard-plugin replacement, and target-architecture recommendations.

Why teams use it

- Saving >70% of effort
- Faster, repeatable plugin migration
- Far less manual rework
- Predictable, documented results

Preserve, don't rebuild

- Wraps existing UI5 components
- Views and business logic stay intact
- No manual rewrite

Practical even for complex plugins

Documentation-driven accuracy

- 40+ verified migration guides
- Only relevant rules are loaded
- The Agent operates strictly within defined rules — never improvising."

Every change follows a validated POD 2.0 rule set

Honest about uncertainty

- Flags anything unconfirmed
- Keeps original code with a TODO
- Full change report per run

No guesswork, clear human decisions

POD 2.0 Migration Service – How to

1. Send us your PODs and plugins (Zip format)

2. We analyze each plugin — refactor to a standard plugin or simple dialogue where possible, and convert the rest

3. We provide a pre-compiled POD 2.0 solution (downloadable JSON) with a minimal custom footprint or, alternatively, Zip files containing the converted plugins.

Tangible benefits

- Migrate view-heavy plugins without rebuilding from scratch: **Save more than 70%**
- Refactor to standard plugins or a simple dialogue where it fits: **Minimize your custom footprint**
- Every change documented and traceable: **Decide what to convert or replace with standard**

Make your choice

- Option 1 (recommended): Benefit from **All Around Carefree Migration Service**
Full migration – fit-to-standard analysis, standard replacements & a ready-to-run solution
- Option 2: **Delegate the Heavy Lifting**
Code conversion only — a small fee per plug-in for technical conversion service
